

Fabio Morini

Software Engineer / Unity Engineer

Barcelona, Spain

morinifabio90@gmail.com · Portfolio: fabiomorini.github.io

Experience

Scopely, Associate Engineer

2026 - Present

- Joining Monopoly Go! engineering team, working on the player lifecycle experience.

DECA Games, Junior Software Engineer

2023 - 2026

- Designed and implemented shared modules supporting **11 shipped Unity games, as well as 3 C++ games**.
- Designed and maintained LiveOps systems for **5 live titles** including Dead Trigger 1 & 2, UNKILLED, Shadowgun Legends, Samurai 2.
- Collaborated with internal teams and external studios to develop and ship critical systems, like web shops.
- Monitored and resolved live issues impacting players in real time globally.

DECA Games, C++ Developer (6 months Internship)

2023

- Contributed to development and maintenance of Robbery Bob and Robbery Bob 2, focusing on gameplay and UI fixes in a production C++ codebase under senior engineer guidance.
- Investigated and resolved gameplay and UI bugs, learning workflows for debugging, and code review.
- Built an internal tool to assist QA in identifying gameplay issues across the levels of the games.

Education

Interactive Digital Contents Degree – ENTI, Universitat de Barcelona

2019 - 2024

- Relevant focus: Game programming, mobile platforms, Unity and Unreal Engine.
